

## *LobGrow*

### *Semi-moist Grow out diet for lobsters*

*LobGrow* is a semi-moist grow out diet designed specifically for lobster juveniles reared in sea cages or on-shore tank system. Its texture resembles natural feed consistency. *LobGrow* contains natural feed attractants developed by NutraKol. While *LobGrow* is semi-moist (30-35% moist), it will not break down in the water due to its unique composition. *LobGrow* is stable for 24 hours in the water, preventing water pollution and reduce bacteria growth. *LobGrow* can be fed as full diet replacing any fresh or frozen feed, reducing the risk of pathogens and diseases. *LobGrow* contains only dry ingredients with no fresh organisms included.

#### **Benefits:**

- Natural, no synthetic or fresh ingredients (i.e. ‘trash fish’)
- ‘Tailor-made’ to requirement
- Prevent any essential nutrients shortage
- Safe and beneficial for any crustaceans
- Improve stress resistance development
- Improve growth and survival

Typical analysis (may vary according to requirements)

|              |        |
|--------------|--------|
| Protein      | 60-65% |
| Lipids       | 10-15% |
| Ash          | 8-10%  |
| Carbohydrate | 10-15% |
| Moist        | 30-35% |

One Kg of *LobGrow* is equal to 4-5 kg of fresh feed.  
Shelf-life: 6 months at 4°C, 24 months when frozen.
